2020 GLC-AAPM Annual Meeting (virtual)
“Current and Emerging Challenges in the Field of Medical Physics, and Future Directions”
Wednesday, December 2nd, 5:00 pm – 9:00 pm EST

We invite all GLC members and friends to join us for the 2020 GLC-AAPM Annual Meeting to learn more about the current and emerging challenges and future directions in the field of Medical Physics!

RSVP/Register Here

Note: Please complete the following short survey by November 30th, 10 PM. The responses will be incorporated into Dr. Huyn’s talk entitled: “MedPhys3.0: Smart Practice and the future of medical physics”. The survey can be accessed by clicking here.

Thanks to our sponsors for helping us continue to provide GLC-AAPM events!

Gold Sponsors
**Invited Speakers**

**James Balter, Ph.D.**  
Associate Chair for Physics Research  
University of Michigan  
Ann Arbor, MI

**Lisa Benedetti**  
Clinical Physics Director  
Beaumont Health  
Royal Oak, MI

**J. Daniel Bourland, Ph.D.**  
Radiation Physics and Dosimetry Core Leader  
Wake Forest University, Winston-Salem, NC

**Jay Burmeister, Ph.D.**  
Medical Physics Graduate Programs Director  
Wayne State University  
Detroit, MI

**Megan Hyun, Ph.D.**  
Assistant Professor  
University of Nebraska Medical Center  
Omaha, NE

**Terry Wu, Ph.D.**  
Chief Physicist  
Willis-Knighton Cancer Center  
Shreveport, LA

**Moderators**

**Xuanfeng (Leo) Ding, Ph.D.**  
Lead Medical Physicist  
Proton Beam Therapy  
William Beaumont Health System  
Royal Oak, MI

**Brett Miller**  
Chief Medical Physicist  
Henry Ford Macomb Hospital  
Clinton Township, MI

**Ning (Winston) Wen, Ph.D.**  
Clinical Physics Director  
Radiation Oncology  
Henry Ford Health System  
Detroit, MI
2020 GLC-AAPM Annual Meeting

Wednesday, December 2nd, 5:00 pm – 9:00 pm EST

5:00 pm  Welcoming remarks
          Winston Wen, Ph.D.
          GLC-AAPM President-Elect

5:10 pm  Medical Physics: Perspectives for the Future
          J. Daniel Bourland, Ph.D.
          Moderator: Xuanfeng (Leo) Ding, Ph.D.

5:50 pm  Gold sponsor presentation: Sun Nuclear
       
5:55 pm  The impact of CMS’ Radiation Oncology (RO) Model in the clinical operation and medical physics
          Terry Wu, Ph.D.
          Moderator: Xuanfeng (Leo) Ding, Ph.D.

6:35 pm  Gold sponsor presentation: Varian

6:40 pm  Gold sponsor presentation: Macromedics

6:45 pm  MedPhys3.0: Smart Practice and the future of medical physics
          Megan Hyun, Ph.D.
          Moderator: Winston Wen, Ph.D.

7:25 pm  Gold sponsor presentation: RaySearch

7:30 pm  Gold sponsor presentation: MIM

7:35 pm  Round table discussion: Challenges and changes of medical physics practice in the era of pandemic
          Introduction: Xuanfeng (Leo) Ding, Ph.D.
          Clinical Aspect: Lisa Benedetti, M.S.
          Research Aspect: James Balter, Ph.D.
          Educational Aspect: Jay Burmeister, Ph.D.
          Q &A
          Moderator: Brett Miller, M.S.

8:20 pm  Closing remarks
          Xuanfeng (Leo) Ding, Ph.D.
          GLC-AAPM President

Double and Single Shell Positioning System for SRS treatments

Over 35,000 patients treated

- Also available as: Double Shell Prone
- Sub-millimetre accuracy
- Non Shrink - Non Stick
- Patented Occipital Thermoplastic
- Patient comfort is patient control

The more efficient, flexible, personal & intelligent way to outsmart cancer.

With Ethos® therapy, you can adapt treatment plans daily while transforming your cancer fight completely.

Ethos therapy is our AI-driven holistic solution that lets you choose the most appropriate treatment option based on daily changes in patient anatomy. It also delivers an entire adaptive treatment in a typical 15-minute timeslot, from setup through delivery. Redefine how you fight cancer—experience Ethos therapy at varian.com/ethos today.
RayStation has been designed with your needs and workflow clearly in mind. The intuitive interface makes it a joy to use, however complex the workflow. With ultrafast computation speed and groundbreaking features such as multi-criteria optimization and 4D adaptive radiation therapy, RayStation will revolutionize your planning process.

- Support for all modalities, 3D-CRT, IMRT, VMAT, Tomo and Electrons, Proton planning
- Robust optimization for all treatment techniques
- Real-time evaluation of clinical trade-offs with multi-criteria optimization
- Full support for adaptive with deformable registration, dose tracking and re-planning
- Flexibility beyond the standard user interface via scripting
- Automated planning tools with plan generation protocols, fallback and automated breast planning
- Generate personalized treatment plans in minutes with machine learning*

RayCare will respond to the demand from clinics for a more user-friendly and workflow-oriented information system that can support the future of cancer treatment.

- Comprehensive cancer care
- Active oncology workflow engine
- Schedule and resource optimization
- Seamless integration with RayStation
- Designed for adaptive therapy
- Tumor board management*
- Machine learning system*
- Built for connectivity
- Resilient and scalable architecture

*Subject to regulatory clearance in some markets.

How Confident are you that your Peer Review Process is Effective?

Many of the problems clinicians face, and some they may not be aware of, tie directly to the processes and systems in place for case preparation and review efforts.

45% of Problematic Plans Not Detected in Typical Peer Review*

A 2019 study¹ presented at ASTRO shows that problematic treatment plans often slip through typical chart rounds peer review.

How many errors slip through your peer review process?

Time Constraints and Compromises*

Clinicians deal with time constraints and are forced to make compromises when preparing cases for peer review. Insufficient preparation exacerbates existing inefficiencies during the review process, leading to problematic plans not being detected.

Most Clinics Lack Standardized Documentation

Many clinics struggle when documenting peer review results and are unable to capture structured data. Quality documentation is becoming increasingly important for both process improvement and practice accreditation such as ASTRO APEx².
