### NEAAPM

#### Peter Neurath Young Investigators Symposium

**Date:** Wednesday, May 4, 2016  
**Time:** 1:00 - 5:00 PM  
**Location:** 310 Behrakis  
Northeastern University  
Boston, MA 02115

The Peter Neurath Young Investigators Symposium was created in memory of Dr. Peter Neurath, who was Director of Medical Physics at the Tufts-New England Medical Center from 1968 to 1977. Its purpose is to encourage younger members of the community to present their research to their colleagues. "Young" means anyone in the early phase of their career including trainees, graduate students, post-doctoral fellows, or recent entrants into the field. Talks will be limited to approximately 15 minutes (12 min with 3 min left for questions and discussion). If you are currently advising students or post-docs, please encourage them to present their work.

Interested persons should submit their abstracts (with a maximum of 300 words) to Gregory Sharp ([gcsharp@partners.org](mailto:gcsharp@partners.org)) by April 20, 2016. The abstract format should contain four sections: "Purpose," "Method," "Result," and "Conclusion."

A winner of the Symposium will be chosen by a panel of three judges based on the following criteria: clarity, quality and rigor of work, significance, innovation, timeliness, and interest to the medical physics and biomedical engineering community.

*The NEAAPM YIS is an opportunity for professionals in medical physics, biomedical engineering, and related fields to keep up to date on subjects relevant to the field and interact with colleagues from around the New England area. The meeting is intended for physicists, dosimetrists, therapists, biomedical engineers, and related professionals. It is jointly sponsored by the New England chapter of the AAPM and Northeastern University. We have applied for CAMPEP approval of continuing education credits.*
