Dear Colleagues and NEAAPM members:

The New England Chapter has had an exciting year so far with a successful Winter Meeting and Young Investigator’s Symposium (YIS). We had 17 outstanding presentations at the YIS this year. I would like to congratulate our winner, Rohan Gala (NEU) and our finalists: Jodi Belz (NEU), Elizabeth Huynh (BWH), and Robert Holt (inviCRO).

I invite you all to attend our NEAAPM Annual Summer meeting on Friday June 3rd at a new and beautiful location, Blue Ocean Event Center, located in Salisbury, MA. NEAAPM President-Elect, Gregory Sharp, has put together an excellent and diverse program for this all-day meeting. This meeting has applied for 5.25 CAMPEP credits. We will begin with registration and breakfast at 8am followed by the talks at 9am. A reception, open to all participants, is also scheduled to follow at 4pm. I encourage you to consider registering early via our website, with discounted registration available until May 27th (http://chapter.aapm.org/NE).

I look forward to seeing you all in Salisbury on June 3rd.

Sincerely,
Carla Bradford
President NEAAPM
New England Chapter of the AAPM
2016 Annual Meeting Program

Friday, June 3, 2016
8:00 am – 4:00 pm

Blue Ocean Event Center
Salisbury, MA 01952

8:00    Registration & breakfast

9:00    Welcome and Opening Remarks
         Carla Bradford, PhD, NEAAPM President

9:05    A quantum leap from fee for service to value-based reimbursement
         James Hugh - Senior Vice President, AMAC

9:50    Radiation safety program management
         Michael Talmadge, MS - Lahey Clinic

10:35   Coffee Break

11:00   AAPM Initiatives and healthcare informatics
         Bruce Curran, MS - AAPM President

11:45   FDA: Statutes, regulation, guidance, and inspections
         Orhan H. Suleiman, MS, PhD, FAAPM, FHPS - Former Senior Science Policy Advisor, FDA

12:30   Lunch

1:20    Reproducibility of tube-current modulated CT scans and radiation dose for cardiac PET/CT
         Mi-Ae Park, PhD - Brigham and Women's Hospital

2:05    Clinical implementation and application of electron Monte Carlo
         Yi Wang, PhD, DABR - Massachusetts General Hospital

2:50    Coffee Break

3:15    The future of proton therapy
         Ken Gall, PhD - KPG Consultants

4:00    Reception
NEAAPM meetings are an opportunity for professionals in medical physics to keep up to date on subjects relevant to the field and interact with colleagues from around the New England area. The meeting is intended for physicists, dosimetrists, therapists and others with an interest in medical physics. It is sponsored by the New England chapter of the AAPM. CAMPEP is pending approval of medical physics continuing educational credits for this meeting. MDCB dosimetry credits will not be offered.

Please visit the following link, or use the QR code below to access the evaluation survey needed to obtain your credits: https://www.surveymonkey.com/r/2016_NEAAPM_Summer

RECEIPT

Registration fees for the NEAAPM Annual Meeting, June 3, 2016

NAME: _____________________________________________

RaySafe Xi
Simply Preferred

Why is the RaySafe Xi preferred by the majority of state inspectors, physicists and large imaging companies?

- Setup to first measurement takes under a minute
- Extremely portable and easy-to-use
- Accurate across the entire spectrum of measurements

Call us for a no obligation demonstration and see for yourself why RaySafe Xi is simply preferred.

More information, less work.

Dosimetry Check IGQA™

CIVCO's new Dosimetry Check Image Guided Quality Assurance takes IMRT QA to the next level.
- Software works with any EPID and any treatment technique, including RapidArc® and VMAT, to provide a volumetric measurement for IMRT QA.
- Improves throughput and reduces cost by eliminating the need for phantom measurements.
- Dosimetry Check calculates the dose on the actual patient's CT, enabling you to compare directly to the treatment plan.

Image guided treatments deserve image guided quality assurance.

TO FIND OUT WHY.

Placing your patients in the best position.

Qfix is dedicated to helping radiation therapy professionals provide the best patient care. Confident in the knowledge that you are equipped with the world's finest radiation therapy positioning devices to enhance the probability of positive patient outcomes. The proper fixation devices and a versatile couch top are required to properly position patients for radiation therapy. Qfix provides the world's leading thermoplastics and the most advanced array of couch top treatment solutions. The revolutionary MVue™ IGRT modular couch top allows treatment devices to be quickly customized for individual patient needs.
C-RAD TAKES CARE OF 4D CT AND TREATMENT PROCESS AS YOU FOCUS ON PATIENT

- **INNOVATION**: Auto patient data retrieve & unique QA & QC procedure
- **INTELLIGENCE**: Non-rigid algorithm & auto beam control
- **EASY OF USE**: Color map on patient & true 4D treatment workflow - 4DCT to Respiratory gating radiation therapy

RayStation

**New Dimensions, One Platform**

RayStation® is the result of advanced development and research that has spanned the last two decades. RaySearch’s market-leading optimization algorithms for VMAT, IMRT and 3D-CRT alongside a comprehensive set of tools for traditional 3D planning form the core of the most advanced treatment planning system on the market today! Functionality includes fusion capabilities (CT, PET and MRI), contouring, collapsed cone convolution dose computation and 4D data compatibility, as well as unique features such as multi-criteria optimization, dose tracking, treatment adaptation and deformable registration, all available under one platform. As a company focused on software development, RaySearch Laboratories continues to lead the industry, delivering high performance software to support all of the advanced modalities of the future. If you are considering a new purchase or an upgrade of your current treatment planning system, contact RaySearch for a demo of the exciting RayStation® software.

Questions about shielding?

Contact NELCO. Shielding experts since 1930.
One call answers all your Brachytherapy needs

At IsoAid, we provide services above and beyond the rest.

WE MANUFACTURE both 139.3 or Pa-100 seeds for Prostate Brachytherapy, as well as High-activity seeds for Eye Plaque and Low-activity seeds for Breast Localization.

WE STRAND AND LOAD YOUR ORDERS IN-HOUSE offering you improved quality, service and control of your Brachytherapy program.

WE DELIVER CUSTOM LOADED SEEDS FASTER than anyone in the industry.

WE GIVE YOU THE ACTIVITY YOU WANT, when you want it. No lists. No restrictions.

- We provide Iodine and Plutonium seeds with superior visibility.
- We sterilize your order using enhanced release protocols that exceed industry standards.
- We include independent ADOL calibrated assay in accordance with AAPM TG48.
- We meet all AAPM/RPC dosimetric requirements.
- We offer a generous "no-questions asked" return policy.
- We provide friendly and responsive customer service.

We save you time and money so you can focus on saving lives.

Earning your trust one seed at a time.

Providing safety, efficiency and comfort
Every patient, every fraction, every treatment

"The benefits of AlignRT are to do with patient safety. Major positioning errors and minor positioning errors can all be caught by AlignRT and that’s a major benefit, both for us and for our patients who know they have that extra safety."
Margaret O’Connor, BS RT(T), Manager of Radiation Oncology Technical Services, Health Quest, New York, USA

"AlignRT really gives us a sense of confidence that our patients are positioned correctly, day in, day out."
David Wani, PhD, Senior Physicist, Cone Health Cancer Center, NC, USA

Ensures speed and accuracy in patient setup
Allows you to track patient positioning in real time with sub-millimetric accuracy
Purer optical system: non-invasive and non-contacting, no markers or fiducials needed

*These customer quotes report on dimensions and performance of VisionRT products by independent users. These have not been validated by VisionRT and thus are not moderated by VisionRT. Internal VisionRT’s products should always be validated in an interventional medical practice and facility.
