Dear Colleagues and NEAAPM Members:

I hope you will make plans to join us for the NEAAPM Fall Meeting, which will take place on Friday, November 6 at The Conference Center at Waltham Woods, Waltham, MA (home of the Massachusetts Medical Society). Our President-Elect Carla Bradford has put together yet another excellent speaker roster for this final chapter meeting of the year. The meeting will also include a short chapter business meeting. Please join us for lunch, starting at noon, followed by the meeting kickoff at 1 pm. We have applied to CAMPEP for 3.0 credits for the meeting.

Please consider registering via the website, with discounted early registration available until October 30. The web location is http://chapter.aapm.org/NE

Sincerely,
Ross Berbeco
President NEAAPM
2015 NEAAPM Fall Meeting Agenda for Nov. 6th

**Location:** The Conference Center at Waltham Woods, 860 Winter Street, Waltham, MA

12:00  **Registration & Lunch**

1:00  **Welcome and Opening Remarks**
Ross Berbeco, PhD, NEAAPM President

1:15  **CT Lung Screening in Clinical Practice**
Brady McKee, MD, Section Head, Thoracic Imaging, Radiology
Lahey Hospital & Medical Center, Burlington, MA

2:00  **From Bench to Brain: Image-Guided Endovascular Neurosurgery in the Treatment of Cerebrovascular Disease**
Matthew Gounis, PhD, Director of New England Center for Stroke Research
University of Massachusetts Medical School, Worcester, MA

2:45  **Coffee Break**

3:15  **Business Meeting**

3:45  **A Physicist’s Primer on Deformable Image Registration**
Sarah Geneser, Ph.D., Assistant Professor, Therapeutic Radiology
Yale University School of Medicine, New Haven, CT

4:30  **Dosimetry for the model S700 electronic brachytherapy source and an independent evaluation of the NIST air-kerma rate standard**
Jessica Hiatt, PhD, Sr. Medical Physicist
UMass Memorial Medical Center, Marlborough, MA

5:15  **Adjournment**

NEAAPM meetings are an opportunity for professionals in medical physics to keep up to date on subjects relevant to the field and interact with colleagues from around the New England area. The meeting is intended for physicists, dosimetrists, therapists and others with an interest in medical physics. It is sponsored by the New England chapter of the AAPM. CAMPEP is pending approval of medical physics continuing educational credits for this meeting. MDCB dosimetry credits will not be offered.

Nearly as good as water.

microDiamond

First commercially available synthetic single crystal diamond detector for clinical dosimetry

- Nearly water equivalent for all beam energies
- Extremely small sensitive volume (0.004 mm³), ideal for small field dosimetry
- One single detector for all field sizes up to 40 cm x 40 cm
- Precise, accurate measurements in photon and electron fields
- Minimal energy, temperature and directional dependence

PTW

Radiation Oncology Systems

Efficiency through integration

Fast, accurate and interactive treatment planning tools have made Philips Pinnacle³ the #1 radiation treatment planning system in performance and reliability. Fully integrated photon, electron, stereotactic, brachytherapy, simulation, image fusion, IMRT options and most recently VMAT planning, available with our SmartArc module, allow you to perform treatment planning tasks from a single platform.

Treatment Simulation  
Advanced visualization tools for pre-planning—imagine being able to view vascular, soft tissue, bony, and abnormal structures at the same time.

Treatment Planning  
Flexible, intuitive planning environment—With Pinnacle³ we have taken great care to design a planning environment that is easy to use and simplifies workflow.

Oncology CT scanners  

Brilliance CT Big Bore  
Oncology scanner offers oncologists an 85 cm bore for optimal patient positioning with high-speed superb resolution.
RayStation® is the result of advanced development and research that has spanned the last two decades. RaySearch's market-leading optimization algorithms for VMAT, IMRT and 3D-CRT alongside a comprehensive set of tools for traditional 3D planning form the core of the most advanced treatment planning system on the market today! Functionality includes fusion capabilities (RT, PFT and MRI), contouring, collapsed cone convolution dose computation and 4D data compatibility, as well as unique features such as multi-criteria optimization, dose tracking, treatment adaptation and deformable registration, all available under one platform. As a company focused on software development, RaySearch Laboratories continues to lead the industry, delivering high performance software to support all of the advanced modalities of the future. If you are considering a new purchase or an upgrade of your current treatment planning system, contact RaySearch for a demo of the exciting RayStation® software.

UTILIZE YOUR WEALTH OF KNOWLEDGE. UNLOCK A WEALTH OF POSSIBILITIES.

Introducing RapidPlan™ knowledge-based treatment planning. Imagine a world where you can unlock the knowledge of your best plans to create the right plan. That’s the power of RapidPlan. Innovative software that helps clinics leverage existing clinical knowledge to create quality plans—quickly and consistently. That means moving beyond templates to create fully customized plans to help you provide the best care for your patients.

Take Control

When treating prostate cancer with brachytherapy, time is critical. Accuracy is paramount, and correct dosimetry is essential. Brachytherapy may be your treatment of choice if you can manage all of these variables. Now you can—with QuickLinX Delivery System. It allows you to take control of the process, delivering fast, accurate, versatile needle loading that makes real-time brachytherapy a reality.

QUICKLINX® Delivery System gives you the benefits of a connected implant with the advantages of real-time planning:

- Simple and intuitive design for efficient loading
- Custom needle loads with variable spacing
- Requires no individual handling of seeds
- For use with SourceLinX® connectors
- Easy verification of seed and spacer configurations

ONE DOMINATES
RADIOSURGERY. THE
OTHER TREATS THE
ENTIRE SPECTRUM OF
RADIATION ONCOLOGY
PATIENTS, AND YOU HELPED
CREATE THEM BOTH.

Thanks to our relationships with clinicians, Accuray is continually resetting the limits of the smallest treatable tumors as well as the largest, regardless of where they are in the body. And to us, adapting to you and your patients is the most important thing of all.

High-Fidelity Simulation for Your SRS Program

The CIRS Stereotactic End-to-End Verification Phantom (STEEV™) serves as a surrogate patient to assess every step of the treatment process - from immobilization and multi-modality imaging (CT, MRI, PET), to thorough treatment plan verification. STEEV's detailed anatomical features provide a most realistic clinical simulation and allow evaluation of the effects inherent in complex intra-and extra-cranial anatomies.

- Verify patient positioning using frame or frameless systems, head and shoulder masks or other patient fixation devices
- Verify patient treatment plan in critical regions
- Perform QA of OBI systems
- Assess image fusion, image transfer QA, accuracy verification and TPS testing with multi-modality imaging capabilities (CT, MRI and PET)
- Perform geometric machine QA including Winston-Lutz isocenter verification and localization/repositioning with couch shift

Evaluate TPS deformable image registration algorithms

Placing your patients in the best position.

Qfix is dedicated to helping radiation therapy professionals provide the best patient care, confident in the knowledge that you are equipped with the world’s finest radiation therapy positioning devices to enhance the probability of positive patient outcomes. The proper fixation devices and a versatile couch top are required to properly position patients for radiation therapy. Qfix provides the world’s leading thermoplastics and the most advanced array of couch top treatment solutions. The revolutionary kWe™ IGRT modular couch top allows treatment devices to be quickly customized for individual patient needs.

Aquaplast RT™ / Fibreplast™
Nothing else compares to the rigidity, resistance to shrinkage and easy molding qualities of our thermoplastic solutions.
Value-added support, when you need it.

As the worldwide leader in Radiation Oncology QA and Dosimetry solutions, our continued mission is to provide the most advanced Patient Safety & QA Solutions for you and your patients. Sun Nuclear Support has over 20 qualified experts on staff, dedicated to providing the customer support you need from installation to implementation.
